

CHEMISTRY RESEARCH & DISCOVERY

Title: Sr. Associate

Department: Chemistry Research & Discovery, Analytical Chemistry

Location: Thousand Oaks, CA & Cambridge, MA

Job ID: amge-00015459

Recruiter: Kevin Coughlin

Grade: N 20

Hiring Manager: David Semin

Requirements

A Bachelors or Masters degree in analytical chemistry or related field is required. The candidate must have a fundamental understanding of separation sciences (e.g., HPLC, GC) and/or spectroscopic techniques (e.g., MS, NMR). A strong capability in troubleshooting, problem solving, data review and interpretation, and multi-tasking is desired. The candidate must have excellent oral and written communication skills, and be willing to work in a fast-paced, team-oriented environment.

Job Summary

The key responsibilities may involve providing separation, purification, and characterization support of raw materials, intermediates, and/or final products involved in the research and development process supporting early discovery to late phase small molecule drug discovery at Amgen. Additional duties include developing, implementing, and transferring analytical protocols and methods across the projects.
