

CV Therapeutics, Inc. is engaged in the discovery and development of novel small molecule drugs for the treatment of chronic cardiovascular diseases. By applying the biomedical discipline of molecular cardiology to delineate mechanisms of cardiovascular disease, we are identifying new targets for drug discovery. The following position is available at our Palo Alto, California facility:

Senior Scientist, Preclinical Development

We are currently seeking a mass spectrometry specialist to perform and report qualitative mass spectrometric studies for the structural elucidation of drug metabolites. Additionally, you will be relied upon to supervise members of the discovery PK and pharmaceuticals group while serving on project teams as the preclinical liaison. This position requires a PhD, 5+ years of relevant experience, and knowledge of quantitation and structural elucidation by MS. Experience maintaining and troubleshooting MS instrumentation will be critical to your success in this role.

CVT offers competitive salaries and an excellent benefits package, including stock options and an employee stock purchase plan. To apply, please email your resume to recruiting@cvt.com, or fax to (650) 475-0502. Visit our website at www.cvt.com Equal Opportunity Employer
