

Requisition : 2013948
Job Title : Master Black Belt - LSCA
Description:

This is your opportunity to join Agilent Technologies Life Science and Chemical Analysis'(LSCA) Business Quality Team as our Master Black Belt. We are two years into our Six Sigma implementation; this is the first Master Black Belt position in the Company. As our Master Black Belt, you will be responsible for the strategic implementation of Six Sigma methodology and knowledge development within LSCA.

Primary responsibilities include:

- Training and coaching Champions, Black Belts and Green Belts in the use of Six Sigma tools and methodology to ensure timely completion of projects with positive material financial payback and positive customer impact
- Assisting in the prioritization, selection and charter of high-impact projects
- Maintaining the integrity of Six Sigma measurements, improvements and tollgates
- Partnering with LSCA Key initiative owners and process owners to clearly link Six Sigma projects and metrics to strategic and operational objectives
- Providing expertise on DMAIC and DMADV methodologies, advanced statistical techniques and quality tools
- Acting as change agent to instill Six Sigma culture throughout organization to drive business results
- Creating and leading process for project review and associated tollga

Qualifications :

Requires:

- BS/MS degree, MBA or equivalent experience preferred.
- 3+ years direct experience as a Master Black Belt and a proven track record managing multiple projects/programs using Six Sigma methodology.
- 7 years experience in a corporate environment with a strong process improvement or quality culture.
- Significant expertise in the tools for process improvement (ex. Six Sigma, Lean Processing, Change Management and Team Building).
- Success in the delivery of Champion and Green Belt training
- Ability to display a positive and mature business presence and sound business acumen with Senior Management.
- Strong analytical and presentation skills.
- Excellent analytical, verbal and written communication skills.
- Ability to interface with all levels within a multi discipline global organization.
- Track record of success leading large scale cross function projects
- Must able to work within a team environment and maintain professional composure in a dynamic work environment that often requires management/completion of multiple tasks.
- Demonstrate sound judgment as well as apply logical/critical thought processes.

Geo Location: Anywhere close to large Agilent Campus.
