

JOB ANNOUNCEMENT

SENIOR SCIENTIST – BIOANALYTICAL METHOD VALIDATION

Alta Analytical Laboratory is seeking an experienced Bioanalytical Scientist to manage the conduct of LC/MS/MS method validations in accordance with GLP and FDA regulations and guidelines. Assume overall responsibility for the technical conduct of bioanalytical validations to include resource planning, data approval, stability, critical scientific review and reporting. Must have thorough working knowledge of GLP and FDA validation and reporting guidelines. Must have excellent communication skills and work directly with clients. Directly involved in the preparation and presentation of data during FDA and client audits. The ideal candidate will have a Ph.D. in related field and at least 5 years of CRO or industry experience as Principal Investigator or related position. Participation at conferences and industry meetings will be encouraged.

This key position is directly related to Alta's continued success and reputation as one of the leading bioanalytical LC/MS/MS contract laboratories in the industry. We are located in the Sierra foothills east of Sacramento between San Francisco and Lake Tahoe. The area offers an attractive northern California lifestyle that is affordable and family oriented. We offer a challenging and excellent work environment that encourages self-motivation and offers opportunities for career advancement. Interested candidates should send resumes by email: lcms2@altalab.com, mail: HR-Box #0, 1104 Windfield Way, El Dorado Hills, CA 95762 or FAX: HR-Box #0, 916-673-0106, DOE/EOE.
